DETAILED ACTION

1. Claims 1-2, 5 and 13 have been canceled and claim 3 has been amended.
2. Claims 3-4 and 6-12 are presented for further examination.

Examiner Comment on Drawings

3. New corrected drawings are required in this application because the application has been filed with informal drawings that are only acceptable for examination purposes. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 3-4 and 6-12 are allowed.

As per claims 3-4 and 6-12, specifically independent claim 3, the prior art of record fails to teach or adequately suggest a feedback control method comprising a plurality of models, wherein each model is composed of a phase advancement model and a phase delay model, and wherein a first weight of a model specifies the weight of the second model, so that there is no need to independently specify the weights of all

the models, so that the amount of calculation required is reduced, in combination with the other claimed features and limitations as claimed by the claimed invention.
